Copy (duplicate)

February 26, 1975

Honorable Henry B. Gonzalez (D-Tex.)
Washington, D. C.

Dear Congressman:

I wish to thank you for your letter of 24 February 75 and the copy of the proposed House Resolution No. 204. My congratulations for your courage; the resolution is brilliant. There is another aspect in the investigation. It is obvious that a very powerful organization behind the government made a pressure on the Warren Commission. It is the absurdity of the "one" (magic) bullet theory. Exhibit 385 was "invented" by Spector (Former D.A. Phila.). It is in complete contradition with the FBI photo of the bullet hole in Kennedy's coat. Just one X-ray hidden in the Files of National Archives showing the path of this bullet could wreck the whole Report. I wrote 2 letters to my Congressman Hon. J. Eilbert (D. -PA) and never got the answer. My question was only: "who could give me technical explanation of the ballistics of the "magic" bullet, like changing the path in the air. Unfortunately, Hon. J. Eilberg acts like a scared rabbit.

My wishes in success of your attempt to start the investigation.

Very truly yours,

Nicholas Kotikov

Hon. Henry B. Gonzalez (D-Tex.) 26 Febr. 75
2446 Rayburn Office Bldg.
Washington D.C. 20515

Dear Sir,

I wish to thank you for your letter of 24 Febr. 75 and the copy of the proposed House Resolution № 204.
My congratulations for your courage; the resolution is brillant. There is an other aspect in the investigation. It is obvious that a very powerful organization behind the gov^t made a pressure on Warren Commission. It is the absurdity of the ~~theory of the~~ one (magic) bullet theory. Exhibit 385 was "invented" by Specter (Former D.A. Phila.). It is in complet contradiction with the FBI photo of the bulled hole in Kennedy's coat. Just one X-ray hidden in Nat. Archives showing the path of the bullet could wreck the whole Report.
I wrote 2 letters to my congressman

Hon. Joshua Eilberg (D-PA) and never got the answer. My question was only who could give me <u>technical</u> explanation of the ballistics of the magic bullet like changing the trajectory in the air. Unfortunately Hon J. Eilberg acts like a scared rabbit. My wishes in success in your attempt starting the investigation

Very truly yours
M. Ko
